With MED e-care you can
OPTIMIZE
your funding and your care!

MED e-care Health Care Solutions together with MDS RAI Research Network are offering you a great **learning opportunity!**

MDS RAI Research Network consists of a team of experts from the University of Alberta, York University and a number of Registered Nurses and Accountants.

The main goal of the team is to provide educational training on all aspects of MDS as it relates to funding, trends and regulations.

**MDS RAI Research Network
incorporates more than 80 years
of combined research and
clinical experience.**

Introduction to MDS

- explaining the benefits of MDS

The Mechanics of MDS

- the basics of MDS and identifying the types and timing of assessments

Coding and Assessing Accurately

- describing the relationship between the purpose of the MDS and the types of questions that appear on the MDS

Resident Assessment Protocols

- identifying and clarifying the four parts of the RAP

How MDS contributes to Care Planning

- describing the relationship between the RAI process, the care plan, and quality resident care

MDS 2.0 Quality Indicators

- understanding the development and benefits of the Quality Indicators

Resource Utilization Groups III

- understanding the development of the RUG-III classification system

Quality Measures and the MDS 2.0

- identifying the objectives of the Nursing Quality Initiatives

Comment about the educator, Dr.A.Paul Beaulne DHA

"Through his exceptional education sessions Paul has taught me that the RAI tool, and the reports the software brings forth, if used properly can benefit all, the patients and the organization. He is a true champion and visionary in his field."

Theresa Gottschalk RN, RAC-C
MDS/NRS Data Coordination, Rouge Valley Health System
